## STONE WALL

Placed in the middle of the house, there's a big wall in natural rugged red stone wall: this semi-circular organic wall, wrap the ambient with color and form. The hearty colors of the stone is in line with the total white of the house.

This wall is made with stones from the the Red Hill and protects from the windy days.

## INTERIORS

The interiors of the house blend perfectly with the style of the structure.

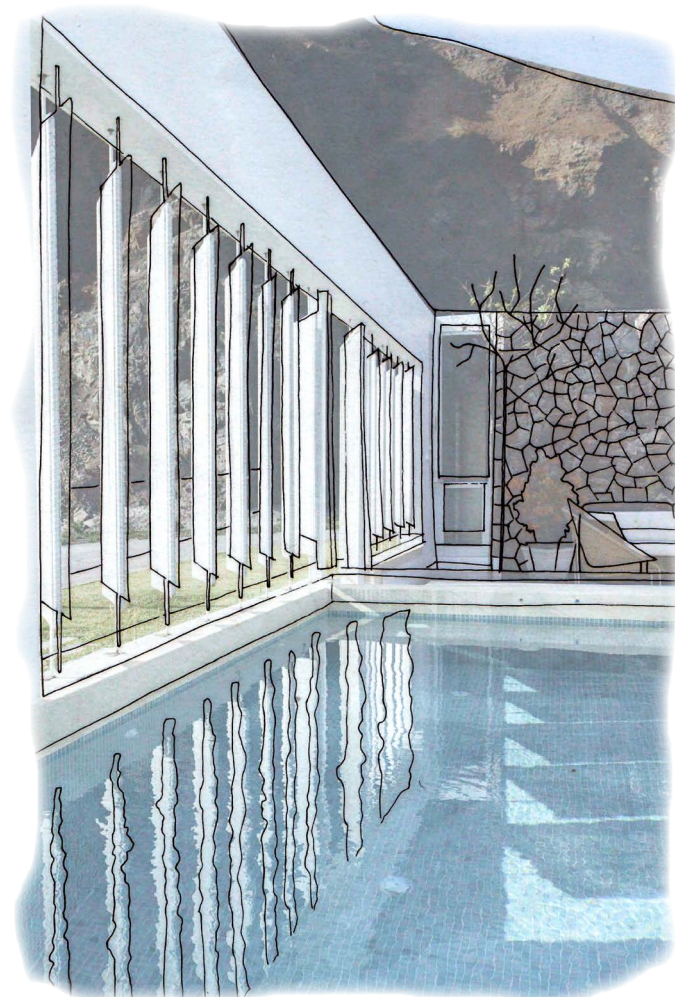

The furnishings recall a chic-industrial style that give the house an elegant and refined atmosphere.

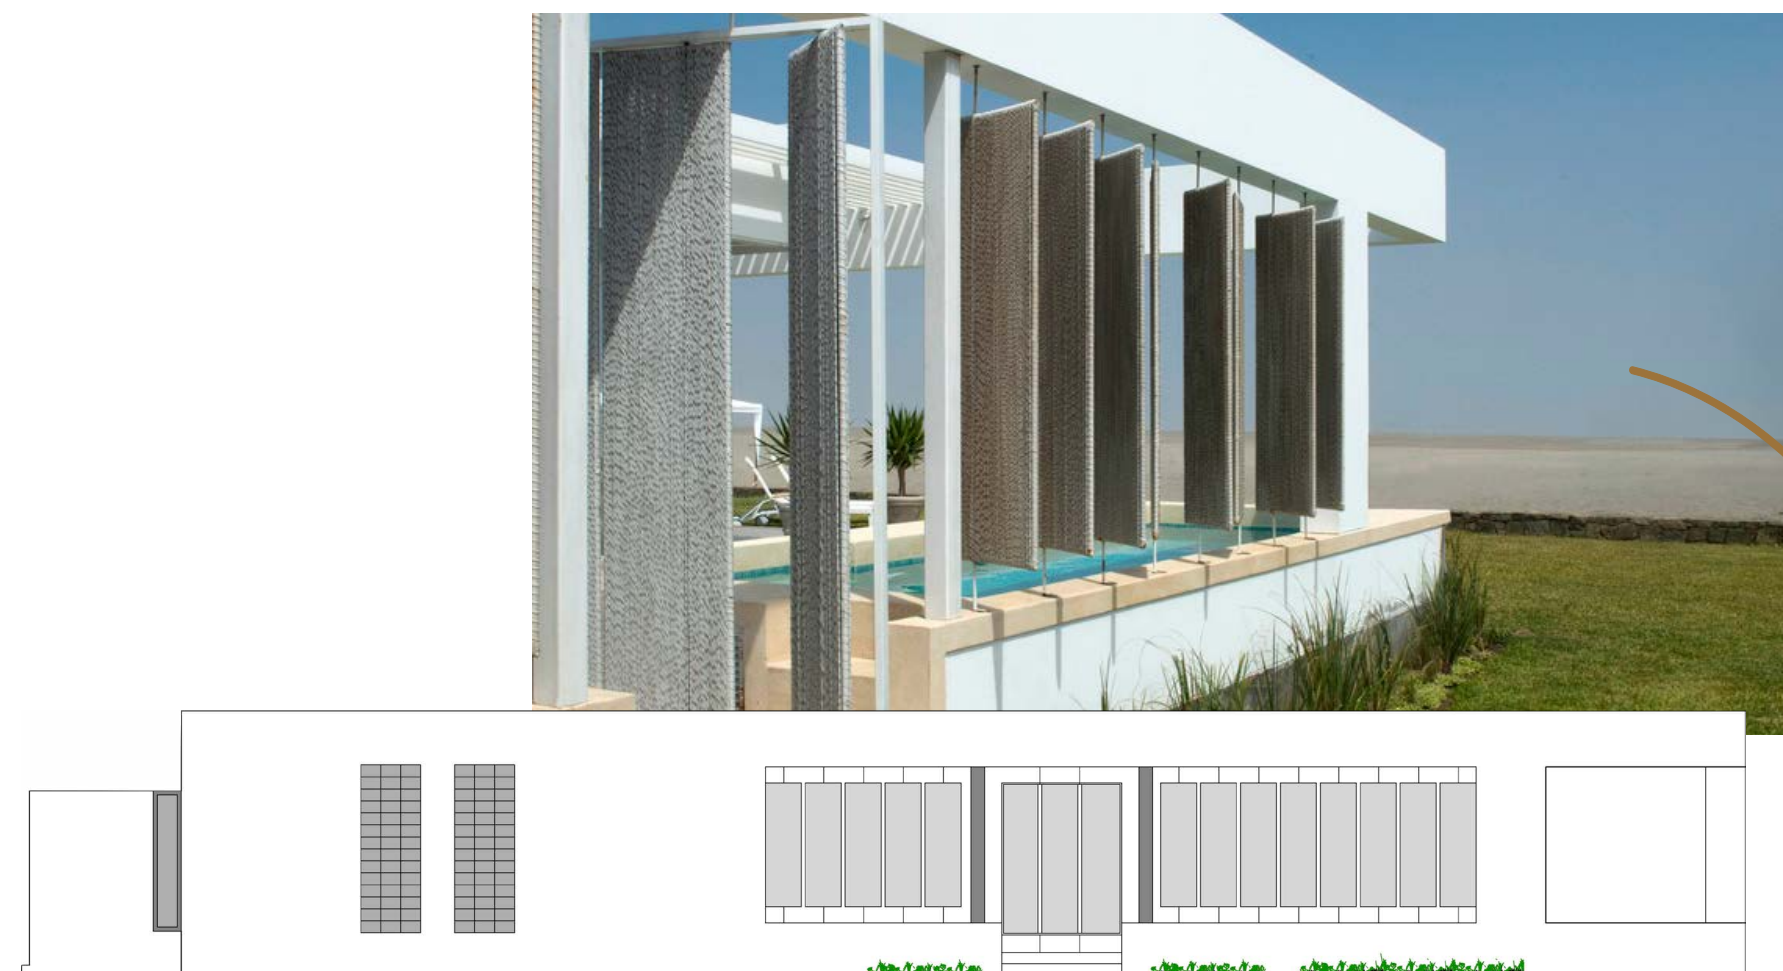

# OUTDOOR

PANELS AND SWIMMING POOL

## PANELS

The rotating panels are a characteristic element of the house. They are located outside and their functionality is related to the environment: they open and close according to the climate and the moment of the day.

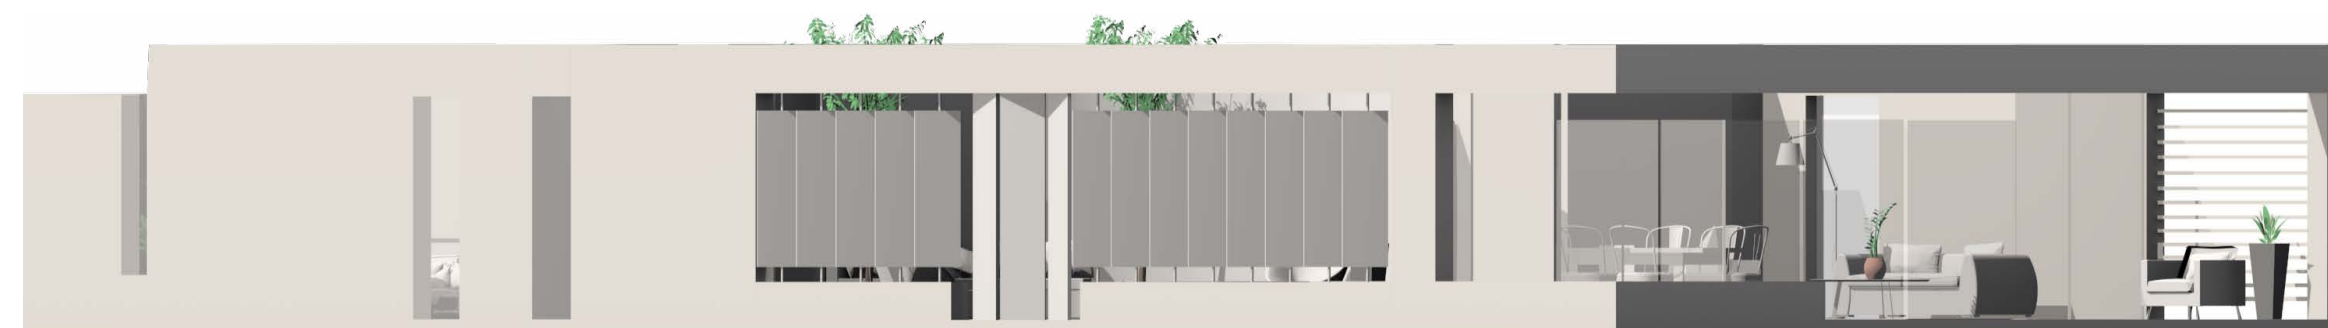

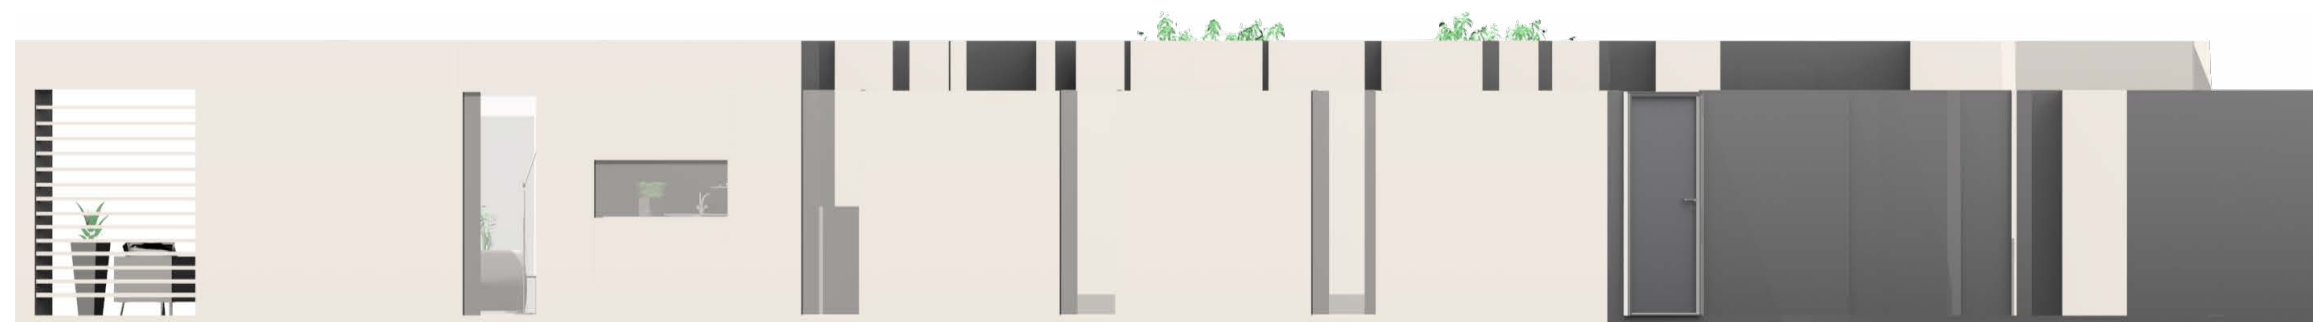

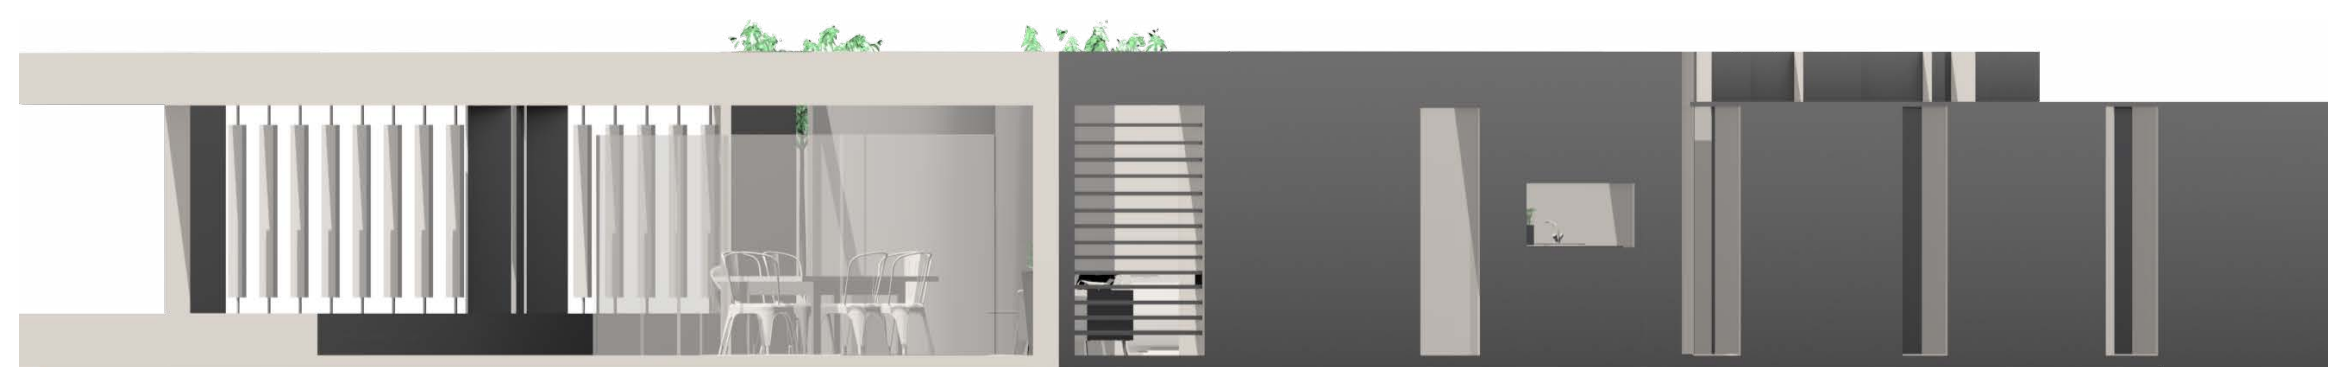

## ENVIROMENT

Daylight and natural ventilation are assured by skylights and small patios that fill the bedrooms and surrounding areas with light and infuse the home with the cheery ambience of a seaside holiday. The interaction between home and environment is really important because the landscape becomes an integral part of the home.
